

COMMERCIAL VEHICLE  
FITOUTS FOR

mining  
drilling  
pipeline  
& trade  
vehicles

There are a number of key considerations when choosing the right supplier for your commercial vehicle fitouts.

Your supplier should have:

1. The ability to provide a wide range of good quality accessory options - at reasonable prices.
2. The ability to deliver completed vehicles back to you on time, on budget and finished to a consistent standard.
3. The network to ensure that if something goes wrong the warranty will be honored in a timely manner and without significant inconvenience to the end user.
4. The ability to safely unload, process and store your vehicle/s safely, no matter how long they are in the care of the supplier.

UV4x4 can deliver on every one of these considerations!

Please call us to discuss your commercial vehicle fitout requirements and how we can help keep unnecessary cost and time delays from impacting on your business.

# A history of delivering on time and on budget

PROVIDING COMMERCIAL VEHICLE FITOUTS SINCE 2006

Our organisation consists of two administration/workshop sites in Brisbane and one site in Ipswich. Collectively we employ over 25 people to look after the needs of our customers, with our main facility at Enoggera having over 3500sqm of workshop and stock storage alone.

Through listening to our customer- base and business partners we have grown into a position where we can provide the widest range of vehicle solutions in South

East Queensland - faster than any of our competitors.

Features of partnering with UV4x4 Fleet are:

- Multiple fitting locations equals less transport for you
- Experienced fitters can provide a range of services
- Large processing area to accommodate fleet orders
- Multiple product options in every product category
- Network of partners to provide backup and warranty
- Call centre to provide you immediate quotes
- Project manager provided for each job

## WEBSITE TOOLS

Our website has a range of information and quotation tools to help you identify what it is that you need in order to comply with mine site regulations - including BMA sites. [www.fleetfit.com.au](http://www.fleetfit.com.au)

## CUSTOMER CALL CENTER

Our staff are on site to look after your needs, right when you call. We will be able to provide you with the information that you require and a quote for your fitout within the hour, if not immediately.

## SAFETY COMES FIRST - EVERY TIME

The safety of your workforce is paramount. That is why UV4x4 only supplies equipment that meets stringent Australian standards.

- All of our ROPS meet LH8, & LK9 codes under VSB 14
- Our installations comply with LH8 & LK10 codes
- Each vehicle is complianced to meet the relevant State or Territory requirements
- UV4x4 staff are BMA trained to ensure safe solutions
- We can help you keep abreast of OH&S developments

## WE ARE A GOOD CHOICE OF SUPPLIER FOR YOU

We employ highly trained staff who have good attention to detail and broad skill-sets.

Due to the size of our business we have arrangements with the largest number of aftermarket accessory manufacturers out of anyone in South East Queensland.

What this means for you is that we have multiple product options in every product category and our buying power sees us being able to provide you with the best pricing available.

We also hold over \$1.5m worth of stock!

## WE CAN PROVIDE YOU WITH JUST ONE THING OR EVERYTHING!

What you may require for a mine or commercial work site often differs vastly to what others may need. We work

with you to help set your vehicles up exactly the way that you want them, using the suppliers and products that you'd prefer.

Our relationships with accessory manufacturers are strong and numerous, which allows us to offer you extremely competitive pricing.

Should you have certain companies that you deal with directly, we can work alongside them to provide other parts of your fitout.

Here are just some of the accessories that we can provide you with:

- A range of alloy, steel & plastic bullbars/nudgebars
- Tray backs, bodies & canopies - including ROPS
- GVM upgrades and suspension system solutions
- Toolboxes, loadracks and load carrying options
- All lighting, electrical, safety and mine vehicle needs
